PROFESSIONAL EXPERIENCE

CIO and Head of IT · Moscow Government
Sep 2025 – Present

Public-sector platforms · 5 internal products · reports to the CEO

- Own technical strategy, platform architecture, DevOps and service operations for 50+ state information systems and five internal products.
- Lead 50+ engineers across development, architecture, DevOps, QA and operations; set the standard for ~50 vendor teams (~500 engineers).
- Cut team onboarding time by 40% by standardizing code practices, GitLab CI, Terraform infrastructure as code and observability across 50+ teams.
- Reduced critical incidents 35% through mandatory static analysis, ELK/Loki centralized logging and SLO/SLI monitoring; acceptance disputes down 60%.

Chief Product Officer · VimpelCom IT
Jul 2023 – Sep 2025

Billing and internal platforms · 100+ person product organization

- Owned the portfolio for the internal business product catalogue and legacy billing and platform systems.
- Grew product consumption 300% year over year through UX redesign and 1,700+ new product offers.
- Cut operating costs 20% without quality loss and shipped 10+ business releases per half-year, aligning management, marketing, sales and support.

Chief Product Officer · Sber
Jan 2021 – Jul 2023

Partner platforms · FinTech and banking

- Built the partner platform from zero — partner account, analytics, electronic document exchange, SberID authentication, storefront and pricing; reached 500,000 daily active users.
- Moved the mobile sales workplace to web (50+ service methods); added DWH, BI, end-to-end analytics, CRM, IP telephony and one-time-token payments.
- Led three product teams of 40+ people and coordinated vendors, contractors and multiple business lines.

Head of Project Management · Moscow Government
2019 – 2021

IT architecture, portfolio and public procurement

- Ran the IT architecture project portfolio: governance, delivery planning, procurement and stakeholder alignment in a regulated environment.

Head of Product Analytics · Samsung Group
Jan 2016 – Dec 2019

B2B products and analytics

- Led a 30-person cross-functional team; built a Knowledge Base Center and embedded analytics and KPI management into product operations.
- Shipped B2B products — customer portal, loyalty, SSO, CRM, document exchange — and lifted ad effectiveness with event-based analytics.
